

Santosh K.C.

Lalitpur, Nepal | +977 9861421989 | santoshkc7786@gmail.com | [GitHub](#) | [Portfolio](#) | [Linked in](#)

Full-stack web development student with hands on experience building real-time applications, e-commerce platforms, and design focused tools through self-driven projects. Strong foundation in frontend + backend development, databases, REST APIs, and deployment workflows. Seeking a Software Development Internship to contribute to production-level systems, strengthen engineering skills, and gain real-world experience in a collaborative environment.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, HTML, CSS
- **Frameworks / Libraries:** React, Next.js, NestJS, Express, Redux, Zustand, TanStack Query
- **Databases:** PostgreSQL, MongoDB, Redis, MySQL
- **Tools / DevOps:** Docker, Git, REST APIs, WebSockets, GraphQL
- **Other:** Prisma, Drizzle ORM, TailwindCSS, JWT, NodeJs

PROJECTS

First Alert - Emergency alert app to quickly notify police, fire, etc respondents with live location. [Code](#)

- Built a real-time emergency alert system where users broadcast incidents and responders accept and manage requests through WebSocket connections.
- Built real-time location tracking with Leaflet and Leaflet Routing, improving routing speed by 7% for live navigation
- Reduced location query latency by 20% by implementing Redis Geo indexing to support low-latency real-time tracking
- Designed secure role-based access control separating user and respondent permissions across REST APIs

Graphic Designing App - Canva-like app for creating posters and designs. [Code](#)

- Developed a browser-based design editor supporting canvas object manipulation, and layered component management.
- Achieved 15% faster API responses by building a high-throughput backend architecture using Hono.js.
- Improved export performance by 12% by leveraging Fabric.js rendering pipeline to efficiently generate and export design assets in multiple formats PNG, JPEG, SVG with optimized rendering workflow
- Developed RESTful APIs and implemented Auth.js authentication with Google and GitHub OAuth to ensure secure and seamless user authentication.

E-Gallery - An online marketplace for buying and selling collectibles, artworks, and more. [Code](#) [Live](#)

- Built a full-stack marketplace with role-based access control supporting separate admin and customer dashboards.
- Reduced server request load by 30% by optimizing product data handling through client-side state management.
- Integrated Stripe for international payments and ESewa for domestic transactions with multi-region checkout support.
- Improved application security and reduced API latency by 15% by implementing JWT authentication and validation for seller and admin product management workflows.

WORK EXPERIENCE

Cloud Factory - Data Annotation Specialist, Remote

Sept 2022 - Feb 2023

- Analyzed and annotated hundreds of American Football, Volleyball, and Basketball game recordings for computer vision training datasets
- Collaborated remotely with team leads and project captains to standardize annotation processes and ensure efficient delivery pipeline execution.

EDUCATION

Tribhuvan University,

Bachelor of Computer Application (BCA)

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Web Technology, DBMS, Operating Systems, Computer Networking, Software Engineering, System Analysis & Design
